EDUCATION

Dayananda Sagar College of Engineering

Bachelor of Engineering in Computer Science & Business Systems (CGPA: 8.15)

Bengaluru, India

2023 – Present

Sri Chaitanya PU College

Class XII – Physics, Chemistry, Mathematics (Score: 97.00%)

Hyderabad, India

2021 – 2023

Dream World School

Class X – Secondary School Leaving Certificate (Score: 80.00%)

Ballari, India

2020 – 2021

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, Java, SQL

Frameworks & Web: Next.js 15, React 19, Tailwind CSS, Flask, Node.js, Express, REST APIs

AI, ML & Data: OpenCV, TensorFlow, Scikit-Learn, Pandas, NumPy, NLP, Prompt Engineering

Tools & Cloud: PostgreSQL, SQLite, MySQL, Supabase, Git, GitHub Actions CI/CD, Docker, AWS S3, Power BI

EXPERIENCE

Full-Stack & AI Software Developer

Jan '25 – Present

Independent Project Engineering & Systems Development

Bengaluru, India

- Architected and deployed full-stack web applications, automated monitoring pipelines, and LLM-integrated developer tools using Next.js 15, TypeScript, Python, and PostgreSQL.
- Implemented asynchronous telemetry queues, database schemas with Row-Level Security, and automated CI/CD build actions ensuring 100% test coverage.

AI Enthusiast & Technical Peer Mentor

Jan '25 – Present

Dayananda Sagar College of Engineering

Bengaluru, India

- Organized practical workshops on machine learning architectures, algorithm design, and clean-coding principles for 40+ engineering peers.
- Mentored student project groups through debugging, database normalization, and milestone delivery schedules.

PROJECTS

AI-Powered Code Generator & Debugging System | Python, Flask, Generative AI, LLMs

Jan '26 – Mar '26

Intelligent Developer Assistant [[GitHub](#)]

- Architected a Flask web tool that identifies subtle logic bugs and generates modular code from natural language prompts using LLM APIs.
- Engineered an asynchronous backend pipeline for near real-time code optimization recommendations and test scaffolding.

Pothole Tagging & Road Damage System | Python, OpenCV, Computer Vision, Power BI

Oct '25 – Nov '25

Automated Infrastructure Computer Vision System

- Built an automated image-processing video pipeline using OpenCV to detect and log road damage anomalies for municipal inspections.
- Connected spatial detection telemetry into interactive Power BI dashboards for instant infrastructure risk heatmaps.

PulseGuard — Uptime & API Health Monitor | Next.js 15, TypeScript, React 19, SQLite, Postgres

Jan '25 – Mar '25

High-Performance Infrastructure Telemetry Suite [[GitHub](#)]

- Architected a full-stack uptime monitoring platform featuring automated multi-frequency HTTP probes and latency analytics (Recharts).
- Engineered an auto-recovering incident state machine, edge cron runners, and public status pages backed by SQLite and PostgreSQL.

CERTIFICATIONS & ACHIEVEMENTS

NPTEL: Certified in Affective Computing (Machine Emotion Interpretation & HCI)

Infosys Springboard: Certifications in C, C++, Python, and Data Structures & Algorithms

Udemy Professional: Corporate Analysis, Systems Workflow, and Business Strategy Frameworks
