Portfolio: ksuchirreddy.github.io | GitHub: github.com/ksuchirreddy | Bengaluru, India

EDUCATION

Dayananda Sagar College of Engineering <i>Bachelor of Engineering in Computer Science & Business Systems (4th Year CGPA: 8.15)</i>	Bengaluru, India 2023 – 2027
Sri Chaitanya PU College <i>Class XII – Physics, Chemistry, Mathematics (Score: 97.00%)</i>	Hyderabad, India 2021 – 2023
Dream World School <i>Class X – Secondary School Leaving Certificate (Score: 80.00%)</i>	Ballari, India 2020 – 2021

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, C++, SQL (PostgreSQL, MySQL, SQLite)
Backend & Systems: RESTful APIs, Node.js, Express, Python (Flask), JSON Schema Validation, Asynchronous Tasks
Frontend & UI: React.js, Next.js 15, TypeScript, Tailwind CSS, HTML5, CSS3, State Management
Databases & Infrastructure: PostgreSQL, SQLite, MySQL, Supabase, Git, GitHub Actions (CI/CD), Postman
Data & Computer Vision: OpenCV, Pandas, NumPy, Generative AI APIs, Prompt Engineering
Core CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems

EXPERIENCE & TECHNICAL LEADERSHIP

Software Engineer — Systems & Applications <i>Independent Engineering & Production Systems</i> - Architected modular web applications, automated telemetry monitors, and developer tools using TypeScript, Python, and PostgreSQL. - Engineered robust backend micro-APIs with structured schema validation, indexed database relations, and asynchronous pipeline execution. - Automated CI/CD integration workflows via GitHub Actions for linting, unit testing, and reliable deployment cycles.	Jan '25 – Present Bengaluru, India
Technical Peer Mentor & AI Enthusiast <i>Department of Computer Science & Business Systems, DSCE</i> - Organized interactive problem-solving workshops on Data Structures, OOP architectures, and backend design for 40+ engineering students. - Guided student teams through database normalization, REST API structuring, and Git collaborative version control.	Jan '25 – Present Bengaluru, India

PROJECTS

PulseGuard — High-Performance Infrastructure Telemetry Suite <i>React, Next.js 15, TypeScript, PostgreSQL</i> <i>Reliability Engineering & Incident Management</i> [Live Working Model] - Architected a scalable uptime monitoring suite executing automated multi-frequency HTTP probes and sub-second latency analytics. - Engineered a state-machine-driven incident detection and automated recovery pipeline backed by PostgreSQL and SQLite. - Built interactive telemetry dashboards with Recharts, public incident pages, and real-time endpoint status verification.	Jan '25 – Mar '25
AI-Powered Code Generator & Debugging Platform <i>Python, Flask, LLMs, REST APIs</i> <i>Developer Productivity & Code Analysis Suite</i> [Live Working Model] - Developed an automated code diagnosis tool leveraging Python and LLM APIs to detect logic errors and synthesize optimized code. - Built an asynchronous processing pipeline delivering sub-second code review suggestions, test scaffolding, and complexity metrics. - Implemented clean RESTful endpoints and interactive client interfaces for streamlined debugging workflows.	Jan '26 – Mar '26
AI Pothole Tagging & Surface Distress Vision System <i>Python, OpenCV, Flask, Computer Vision</i> <i>Real-Time Spatial Telemetry & Video Processing Pipeline</i> [Live Working Model] - Built an automated computer vision video processing pipeline in Python using OpenCV edge detection and contour segmentation. - Developed a high-throughput Flask REST API for spatial defect classification, severity tagging, and telemetry logging.	Aug '26 – Present

CERTIFICATIONS & KEY ACHIEVEMENTS

Infosys Springboard: Certified in Data Structures & Algorithms, Python, Java, and C/C++ (Object-Oriented Programming)
NPTEL Certification: Certified in Affective Computing (Machine Emotion Interpretation, HCI & AI Systems)
Competitive Programming: Active problem solver on LeetCode (**Contest Rating: 1524**, 50+ problems solved) & HackerRank
