Portfolio: ksuchirreddy.github.io | GitHub: github.com/ksuchirreddy

EDUCATION

Dayananda Sagar College of Engineering

Bachelor of Engineering in Computer Science & Business Systems (4th Year | CGPA: 8.15)

Bengaluru, India

2023 – 2027

Sri Chaitanya PU College

Class XII – Physics, Chemistry, Mathematics (Score: 97.00%)

Hyderabad, India

2021 – 2023

Dream World School

Class X – Secondary School Leaving Certificate (Score: 80.00%)

Ballari, India

2020 – 2021

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, C++, SQL (PostgreSQL, MySQL, SQLite)

Frontend & Web: React.js, Next.js 15, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)

Backend & APIs: Python (Flask), Node.js, Express, RESTful APIs, JSON

AI, ML & Data: OpenCV (Computer Vision), Pandas, NumPy, Prompt Engineering, Generative AI APIs

Developer Tools: Git, GitHub, VS Code, Postman, Supabase, GitHub Actions

Core Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS

EXPERIENCE

Python & AI Software Engineer

Jan '25 – Present

Independent Project Development & Engineering

Bengaluru, India

- Architected and deployed Python-driven applications, automated computer vision pipelines, and LLM-integrated developer tools using Python, Flask, and PostgreSQL.
- Implemented asynchronous telemetry queues, database schemas with structured indexing, and automated CI/CD build actions ensuring 100% test coverage.

AI Enthusiast & Technical Peer Mentor

Jan '25 – Present

Dayananda Sagar College of Engineering

Bengaluru, India

- Organized practical workshops on machine learning architectures, algorithm design, and clean-coding principles for 40+ engineering peers.
- Mentored student project groups through debugging, database normalization, and milestone delivery schedules.

PROJECTS

AI-Powered Code Generator & Debugging System | Python, Flask, Generative AI, LLMs

Jan '26 – Mar '26

Intelligent Developer Assistant [\[Live Working Model\]](#)

- Architected a Flask web tool that identifies subtle logic bugs and generates modular code from natural language prompts using LLM APIs.
- Engineered an asynchronous backend pipeline for near real-time code optimization recommendations and test scaffolding.

AI Pothole Tagging System | Python, OpenCV, Computer Vision, Flask

Aug '26 – Present

Real-Time Road Distress Computer Vision System [\[Live Working Model\]](#)

- Built an automated image-processing video pipeline using OpenCV contour analysis and Canny edge detection to detect and severity-tag potholes.
- Engineered a high-performance Flask REST API deployed on cloud infrastructure with interactive drag-and-drop web telemetry.

PulseGuard — Uptime & API Health Monitor | Next.js 15, TypeScript, React 19, SQLite, Postgres

Jan '25 – Mar '25

High-Performance Infrastructure Telemetry Suite [\[Live Working Model\]](#)

- Architected an infrastructure monitoring platform featuring automated multi-frequency HTTP probes and latency analytics (Recharts).
- Engineered an auto-recovering incident state machine, edge cron runners, and public status pages backed by SQLite and PostgreSQL.

CERTIFICATIONS & ACHIEVEMENTS

Infosys Springboard: Certified in Data Structures & Algorithms, Python, Java, and C/C++

NPTEL Certification: Certified in Affective Computing (Machine Emotion Interpretation & HCI Systems)

Udemy Professional: Corporate Systems Workflow, Enterprise Software Design, and Business Strategy
