

K. Suchir Reddy

Third Year Undergraduate

Department of Computer Science & Business Systems

Dayananda Sagar College of Engineering, Kumaraswamy Layout, Bengaluru

ksuchirreddy@gmail.com | +91 7899597757 | LinkedIn

SUMMARY

- Detail-oriented computer science student and AI enthusiast driven by a passion for building intelligent systems. Experienced in creating complete machine learning workflows, fine-tuning deep learning models, and delivering clean, accessible software that solves practical data problems.

ACADEMIC DETAILS

Degree	Specialization	Institute	Year	CPI/%
B.E.	Computer Science & Business Systems	Dayananda Sagar College of Engineering, Kumaraswamy Layout, Bengaluru	2023-Present	8.15
Class XII	Physics, Chemistry, Maths	Sri Chaitanya PU College, Hyderabad	2021-2023	97.00%
Class X	SSLC	Dream World School, Ballari	2020-2021	80.00%

PROJECTS

- **AI Powered Code Generator and Debugging System** [Jan '26 - Mar '26]
 - Designed a smart web interface using Flask to help developers quickly locate logic errors and generate code structures using natural language and generative AI techniques.
 - Wrote an efficient backend pipeline that parses user requests on the fly, delivering helpful debugging suggestions and optimization strategies almost instantaneously.
- **Pothole Tagging System** [Oct '25 - Nov '25]
 - Built an image-processing system with OpenCV that analyzes video clips to spot and catalog road damage, helping automate local infrastructure inspections.
 - Translated complex data patterns into accessible, interactive dashboards via Power BI to provide municipal teams with visual, straightforward project insights.
- **AI Comment Toxicity Rewriter** [Jan '25 - Mar '25]
 - Created a natural language processing pipeline to pinpoint toxic or offensive language in text threads, helping build healthier spaces for online interaction.
 - Structured a stable, relational MySQL database back-end to safely log interactions and handle concurrent data requests without slowing down.

CERTIFICATIONS & ACHIEVEMENTS

- Completed formal training through NPTEL in Affective Computing to understand how machines interpret and respond to human emotions.
- Built foundational programming strength in core environments (C, C++, Python, and Data Structures) through targeted industry courses on Infosys Springboard.
- Expanded knowledge of corporate analysis, project workflows, and foundational frameworks via professional business certifications on Udemy.

TECHNICAL SKILLS

- **Programming Languages:** Python, C, C++, Java
- **Libraries & Frameworks:** Pandas, NumPy, TensorFlow, Flask, NLP, OpenCV, Scikit-Learn
- **Tools & Databases:** MySQL, DBMS, AWS S3, Power BI, Git
- **Soft Skills:** Team Collaboration, Analytical Problem Solving, Agile Adaptability, Clear Technical Communication

POSITIONS OF RESPONSIBILITY

- **AI Enthusiast & Peer Mentor** [Jan '25 - Present]
 - Hosted practical study sessions and collaborative reviews with fellow students to simplify machine learning architectures and share clean-coding best practices.
 - Guided team discussions around algorithm design and technical problem solving, helping project groups build confidence and deliver software updates on schedule.
