EDUCATION

Dayananda Sagar College of Engineering <i>Bachelor of Engineering in Computer Science & Business Systems (CGPA: 8.15)</i>	Bengaluru, India 2023 – 2027
Sri Chaitanya PU College <i>Class XII – Physics, Chemistry, Mathematics (Score: 97.00%)</i>	Hyderabad, India 2021 – 2023
Dream World School <i>Class X – Secondary School Leaving Certificate (Score: 80.00%)</i>	Ballari, India 2020 – 2021

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, Java, SQL
Frameworks & Web: Next.js 15, React 19, Tailwind CSS, Flask, Node.js, Express, REST APIs
AI, ML & Data: OpenCV, TensorFlow, Scikit-Learn, Pandas, NumPy, NLP, Prompt Engineering
Tools & Cloud: PostgreSQL, SQLite, MySQL, Supabase, Git, GitHub Actions CI/CD, Docker, AWS S3, Power BI

EXPERIENCE

Full-Stack & AI Software Developer <i>Independent Project Development & Engineering</i> - Architected and deployed full-stack web applications, automated monitoring pipelines, and LLM-integrated developer tools using Next.js 15, TypeScript, Python, and PostgreSQL. - Implemented asynchronous telemetry queues, database schemas with Row-Level Security, and automated CI/CD build actions ensuring 100% test coverage.	Jan '25 – Present Bengaluru, India
AI Enthusiast & Technical Peer Mentor <i>Dayananda Sagar College of Engineering</i> - Organized practical workshops on machine learning architectures, algorithm design, and clean-coding principles for 40+ engineering peers. - Mentored student project groups through debugging, database normalization, and milestone delivery schedules.	Jan '25 – Present Bengaluru, India

PROJECTS

AI-Powered Code Generator & Debugging System <i>Python, Flask, Generative AI, LLMs</i> <i>Intelligent Developer Assistant</i> [Live Working Model] - Architected a Flask web tool that identifies subtle logic bugs and generates modular code from natural language prompts using LLM APIs. - Engineered an asynchronous backend pipeline for near real-time code optimization recommendations and test scaffolding.	Jan '26 – Mar '26
AI Pothole Tagging System <i>Python, OpenCV, Computer Vision, Flask</i> <i>Real-Time Road Distress Computer Vision System</i> [Live Working Model] - Built an automated image-processing video pipeline using OpenCV contour analysis and Canny edge detection to detect and severity-tag potholes. - Engineered a high-performance Flask REST API deployed on cloud infrastructure with interactive drag-and-drop web telemetry.	Aug '26 – Present
PulseGuard — Uptime & API Health Monitor <i>Next.js 15, TypeScript, React 19, SQLite, Postgres</i> <i>High-Performance Infrastructure Telemetry Suite</i> [Live Working Model] - Architected a full-stack uptime monitoring platform featuring automated multi-frequency HTTP probes and latency analytics (Recharts). - Engineered an auto-recovering incident state machine, edge cron runners, and public status pages backed by SQLite and PostgreSQL.	Jan '25 – Mar '25

CERTIFICATIONS & ACHIEVEMENTS

NPTEL: Certified in Affective Computing (Machine Emotion Interpretation & HCI)
Infosys Springboard: Certified in C, C++, Python, and Data Structures & Algorithms
Udemy Professional: Corporate Analysis, Systems Workflow, and Business Strategy Frameworks
